U.S. Mint Celebrates 1000 Year Anniversary of Leif Ericson's remarkable achievement

Leif Ericson Millennium Commemorative Coins

1000 years ago, Leif Ericson set sail and discovered a magnificent New World. To commemorate the anniversary of his remarkable achievement, **the United States Mint is proud to announce its first-ever jointly released coin set.** Two beautifully detailed coins designed respectively by the United States and The Republic of Iceland, minted by the United States Mint.

The U.S. coin displays a heroic portrait of the intrepid explorer on the obverse and a depiction of his Viking ship under full sail on the reverse. The obverse of the Icelandic coin features an image of Stirling Calder's famous sculpture of Leif Ericson, presented to Iceland by the U.S. in 1930; the reverse depicts the eagle, the dragon, the bull and the giant from the Icelandic Coat of Arms.

A portion of the proceeds from the sale of each coin is authorized to be donated to the Leifur Eiríksson Foundation for funding of student exchanges between students of the United States and Iceland.

The U.S. Silver Dollar is available as a mirror-like proof or uncirculated coin. The Icelandic silver coin is offered in proof only. The Two-Coin Set includes both proof coins, the U.S. and Icelandic versions. All coins are boxed in presentation cases at the originating mint facility, Philadelphia.
